

We're hiring!

Are you an awesome 'front-end' Software Developer?

Do you want to get a lot more satisfaction out of your professional working life?

Do you want to work for a company that appreciates you, rewards you and provides a great work/life balance?

Do you want to be challenged and have the opportunity to take ownership of exciting software projects?

... If so, let's catch up for a chat.

The company.

Based in Adelaide, South Australia and established in 2007, we are a fast-growing software company providing digital supply chain solutions to iconic global brands. We have created innovative automation software that is ranked number one in the world by independent digital experts.

This is an opportunity to work for a company that genuinely cares about its team. We appreciate that quality people and hard work deserves recognition. Portalink HQ is a stimulating workplace in Adelaide's CBD where our technical team works in close collaboration in an agile environment. We are also very flexible with WFH days each week. We value our great work/life balance including regular lunches and get togethers (Yes! We actually enjoy each other's company, professionally and socially :-)

We make sure that every month has a long weekend, even if it's not officially recognised by the rest of the country. And each member of our team starts building stocks of employee share options after twelve months of employment.

The opportunity.

We are looking for highly skilled developers to build dynamic User Interfaces within our B2B platforms, using the most modern methods and technologies. The position demands a creative thinker who understands how to achieve awesome experiences for our customers based on the design directives provided by our Software Architect.

Qualifications we look for.

- 4 years (minimum) experience in front end developing
- Thoughtful web design/development
- Responsive design
- Experienced with SPA's like ReactJS
- Considers and creates reusable components
- Preference for Typescript over Javascript
- Experience with API consumption
- Conversant in CSS
- Proven UI/UX experience
- Comfortable in Linux/Unix environments
- Considers a well laid out project structure
- Experience with GIT and GIT workflows during development
- Consistently writes unit & end-to-end tests
- Can showcase above skills

How to apply.

If this opportunity excites you, please send your resume with a covering one page letter explaining why you're the right person for Portalink. Email to:

joinus@portalink.com

Bucking the Trend: In an industry renowned for high staff turnover, the average time each member of our tech team has been with Portalink is more than 6 years. And right now, we're more passionate than ever.
